challenges such as climate change or food security global pandemics or energy security But responding to these demands is
made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very
structures institutions and processes of science and innovation and with it their claims about desirable futures Our
understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a
pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and
