Consciousness in Locke Shelley Weinberg, 2016-01-07 Shelley Weinberg argues that the idea of consciousness as a form of non evaluative self awareness runs through and helps to solve some of the thorniest issues in Locke's philosophy in his philosophical psychology and in his theories of knowledge personal identity and moral agency Central to her account is that perceptions of ideas are complex mental states wherein consciousness is a constituent Such an interpretation answers charges of inconsistency in Locke's model of the mind and lends coherence to a puzzling aspect of Locke's theory of knowledge how we know individual things particular ideas ourselves and external objects when knowledge is defined as the perception of an agreement or relation of ideas In each case consciousness helps to forge the relation resulting in a structurally integrated account of our knowledge of particulars fully consistent with the general definition This model also explains how we achieve the unity of consciousness with past and future selves necessary for Locke's accounts of moral responsibility and moral motivation And with help from other of his metaphysical commitments consciousness so interpreted allows Locke's theory of personal identity to resist well known accusations of circularity failure of transitivity and insufficiency for his theological and moral concerns Although virtually every Locke scholar writes on at least some of these topics the model of consciousness set forth here provides for an analysis all of these issues as bound together by a common thread

Consciousness in Locke's "Essay." Shelley Weinberg, 2008 Locke seems to have consciousness play an important role in several of the most philosophically interesting areas of his philosophy in his theories of memory personal identity sensitive knowledge and in his version of the cogito argument Locke's accounts of personal identity and sensitive

knowledge continue to pose serious problems for interpreters seeking to find in Locke coherent views I argue that consciousness understood as a special kind of reflexive and proprietary perception internal to the perception of an idea is consistent with Locke's model of the mind and allows for solutions to Locke's theories of sensitive knowledge and personal identity
