Craigslist Chicago Heights:

Chicago Tribune Index ,2006 The Voltage Effect John A. List,2022-02-01 NATIONAL BESTSELLER A leading economist answers one of today's trickiest questions Why do some great ideas make it big while others fail to take off Brilliant practical and grounded in the very latest research this is by far the best book I've ever read on the how and why of scaling Angela Duckworth CEO of Character Lab and New York Times bestselling author of Grit **LONGLISTED FOR THE PORCHLIGHT BUSINESS BOOK AWARD** Scale has become a favored buzzword in the startup world But scale isn't just about accumulating more users or capturing more market share It's about whether an idea that takes hold in a small group can do the same in a much larger one whether you're growing a small business rolling out a diversity and inclusion program or delivering billions of doses of a vaccine Translating an idea into widespread impact says University of Chicago economist John A List depends on one thing only whether it can achieve high voltage the ability to be replicated at scale In The Voltage Effect List explains that scalable ideas share a common set of attributes while any number of attributes can doom an unscalable idea Drawing on his original research as well as fascinating examples from the realms of business policymaking education and public health he identifies five measurable vital signs that a scalable idea must possess and offers proven strategies for avoiding voltage drops and engineering voltage gains You'll learn How celebrity chef Jamie Oliver expanded his restaurant empire by focusing on scalable ingredients until it collapsed because talent doesn't scale Why the failure to detect false positives early on caused the Reagan era drug prevention program to backfire at scale How governments could deliver more services to more citizens if they focused on the last dollar spent How one education center leveraged positive spillovers to narrow the achievement gap across the entire community Why the right set of incentives applied at scale can boost voter turnout increase clean energy use encourage patients to consistently take their prescribed medication and more By understanding the science of scaling we can drive change in our schools workplaces communities and society at large Because a better world can only be built at scale **The Why Axis** Uri Gneezy,John List,2013-10-08 Can economics be passionate Can it center on people and what really matters to them day in and day out And help us understand their hidden motives for why they do what they do in everyday life Uri Gneezy and John List are revolutionaries Their ideas and methods for revealing what really works in addressing big social business and economic problems gives us new understanding of the motives underlying human behavior We can then structure incentives that can get people to move mountains change their behavior or at least get a better deal But finding the right incentive can be like looking for a needle in a haystack Gneezy and List's pioneering approach is to embed themselves in the factories schools communities and offices where people work live and play Then through large scale field experiments conducted in the wild Gneezy and List observe people in their natural environments without them being aware that they are observed Their randomized experiments have revealed ways to close the gap between rich and poor students to stop the violence plaguing inner city schools to decipher whether women are

really less competitive than men to correctly price products and services and to discover the real reasons why people discriminate To get the answers Gneezy and List boarded planes helicopters trains and automobiles to embark on journeys from the foothills of Kilimanjaro to California wineries from sultry northern India to the chilly streets of Chicago from the playgrounds of schools in Israel to the boardrooms of some of the world's largest corporations In *The Why Axis* they take us along for the ride and through engaging and colorful stories present lessons with big payoffs Their revelatory startling and urgent discoveries about how incentives really work are both revolutionary and immensely practical This research will change both the way we think about and take action on big and little problems Instead of relying on assumptions we can find out through evidence what really works Anyone working in business politics education or philanthropy can use the approach Gneezy and List describe in *The Why Axis* to reach a deeper nuanced understanding of human behavior and a better understanding of what motivates people and why

Beacons in the Darkness Dave Hoekstra, 2022-10-11 Community journalism has long been a part of the lifeblood of America but never have the stakes been so high for the people behind it In *Beacons in the Darkness* award winning journalist Dave Hoekstra interviews the people trying to keep the lights on at community newspapers across the country amid buyouts declining revenues fake news and a pandemic This book is not another account of the death of local journalism but rather a celebration of the community ties perseverance and empathy that's demonstrated in community newsrooms from Hillsboro Illinois to Charleston South Carolina to Marfa Texas Hoekstra recounts the sometimes scandalous but always industrious stories of the families who built these newspapers and passed them down through generations Modern publishers and owners describe in their own words their struggles and experiments to stay alive in the digital age not just for their businesses and their families but also for the communities they serve and the neighbors whose stories they tell in their reporting *Beacons in the Darkness* provides an intimate view inside the organizations that still publish photos of the local bowling league and the outlandishly large mushrooms on the edge of town leaving you with a rekindled fondness for your own community paper and a renewed appreciation of what we all stand to lose without one

How Sex Got Screwed Up: The Ghosts that Haunt Our Sexual Pleasure - Book Two Jon Knowles, 2019-06-28 The ghosts that haunt our sexual pleasure were born in the Stone Age Sex and gender taboos were used by tribes to differentiate themselves from one another These taboos filtered into the lives of Bronze and Iron Age men and women who lived in city states and empires For the early Christians all sex play was turned into sin instilled with guilt and punished severely With the invention of sin came the construction of women as subordinate beings to men Despite the birth of romance in the late middle ages Renaissance churches held inquisitions to seek out and destroy sex sinners all of whom it saw as heretics The Age of Reason saw the demise of these inquisitions But it was doctors who would take over the roles of priests and ministers as sex became defined by discourses of crime degeneracy and sickness The middle of the 20th century saw these medical and religious teachings challenged for the first time as activists such as Alfred Kinsey and Margaret

Sanger sought to carve out a place for sexual freedom in society However strong opposition to their beliefs and the growing exploitation of sex by the media at the close of the century would ultimately shape 21st century sexual ambivalence Book Two of this two part publication traces the history of sex from the Victorian Era to present day Interspersed with personal hauntings from his own life and the lives of friends and relatives Knowles reveals how historical discourses of sex continue to haunt us today This book is a page turner in simple and plain language about how sex got screwed up for millennia For Knowles if we know the history of sex we can get over it

Upsold Max Besbris,2020-09-05 What do you want for yourself in the next five ten years Do your plans involve marriage kids a new job These are the questions a real estate agent might ask in an attempt to unearth information they can employ to complete a sale which as Upsold shows often results in upselling In this book sociologist Max Besbris shows how agents successfully upsell inducing buyers to spend more than their initially stated price ceilings His research reveals how face to face interactions influence buyers ideas about which neighborhoods are desirable and which are less worthy investments and how these preferences ultimately contribute to neighborhood inequality Stratification defines cities in the contemporary United States In an era marked by increasing income segregation one of the main sources of this inequality is housing prices A

crucial part of wealth inequality housing prices are also directly linked to the uneven distribution of resources across neighborhoods and to racial and ethnic segregation Upsold shows how the interactions between real estate agents and buyers make or break neighborhood reputations and construct neighborhoods by price Employing revealing ethnographic and quantitative housing data Besbris outlines precisely how social influences come together during the sales process In Upsold we get a deep dive into the role that the interactions with sales agents play in buyers decision making and how neighborhoods are differentiated valorized and deemed to be worthy of a certain price *Visa Wives* Radhika
