Cultural Hierarchy In Sixteenth Century Europe The Ottomans And Mexicans:

Cultural Hierarchy in Sixteenth-Century Europe Carina L. Johnson, 2011-09-30 Concentrating on the Habsburg Empire this book examines the creation of cultural hierarchy in sixteenth century Europe Renaissance Ethnography and the Invention of the Human Surekha Davies, 2016-06-02 Davies examines how Renaissance illustrated maps shaped ideas about peoples of the Americas revealing relationships between civility savagery and monstrosity *African Kings and Black Slaves* Herman L. Bennett, 2018-09-10 A thought provoking reappraisal of the first European encounters with Africa As early as 1441 and well before other European countries encountered Africa small Portuguese and Spanish trading vessels were plying the coast of West Africa where they conducted business with African kingdoms that possessed significant territory and power In the process Iberians developed an understanding of Africa s political landscape in which they recognized specific sovereigns plotted the extent and nature of their polities and grouped subjects according to their ruler In *African Kings and Black Slaves* Herman L Bennett mines the historical archives of Europe and Africa to reinterpret the first century of sustained African European interaction These encounters were not simple economic transactions Rather according to Bennett they involved clashing understandings of diplomacy sovereignty and politics Bennett unearths the ways in which Africa s kings required Iberian traders to participate in elaborate diplomatic rituals establish treaties and negotiate trade practices with autonomous territories And he shows how Iberians based their interpretations of African sovereignty on medieval European political precepts grounded in Roman civil and canon law In the eyes of Iberians the extent to which Africa s polities conformed to these norms played a significant role in determining who was and who was not a sovereign people a judgment that shaped who could legitimately be enslaved Through an examination of early modern African European encounters *African Kings and Black Slaves* offers a reappraisal of the dominant depiction of these exchanges as being solely mediated through the slave trade and racial difference By asking in what manner did Europeans and Africans configure sovereignty polities and subject status Bennett offers a new depiction of the diasporic identities that had implications for slaves experiences in the Americas **Religious Materiality in the Early Modern World** Suzanna Ivanic, Mary Laven, Andrew Morrall, 2025-10-01 This collection of essays offers a comparative perspective on religious materiality across the early modern world Setting out from the premise that artefacts can provide material evidence of the nature of early modern religious practices and beliefs the volume tests and challenges conventional narratives of change based on textual sources *Religious Materiality in the Early Modern World* brings together scholars of Catholic Protestant Jewish Islamic and Buddhist practices from a range of fields including history art history museum curatorship and social anthropology The result is an unprecedented account of the wealth and diversity of devotional objects and environments with a strong emphasis on cultural encounters connections and exchanges The Crusades and Visual Culture LauraJ Whatley, 2017-07-05 The crusades whether realized or merely planned had a profound impact on medieval and early modern

societies Numerous scholars in the fields of history and literature have explored the influence of crusading ideas values aspirations and anxieties in both the Latin States and Europe However there have been few studies dedicated to investigating how the crusading movement influenced and was reflected in medieval visual cultures Written by scholars from around the world working in the domains of art history and history the essays in this volume examine the ways in which ideas of crusading were realized in a broad variety of media including manuscripts cartography sculpture mural paintings and metalwork Arguing implicitly for recognition of the conceptual frameworks of crusades that transcend traditional disciplinary boundaries the volume explores the pervasive influence and diverse expression of the crusading movement from the twelfth through the fifteenth centuries

Can We Talk Mediterranean? Brian A. Catlos, Sharon Kinoshita, 2017-09-15 This book provides a systematic framework for the emerging field of Mediterranean studies collecting essays from scholars of history literature religion and art history that seek a more fluid understanding of Mediterranean It emphasizes the interdependence of Mediterranean regions and the rich interaction both peaceful and bellicose at sea and on land between them It avoids applying the national cultural and ethnic categories that developed with the post Enlightenment domination of northwestern Europe over the academy working instead towards a dynamic and thoroughly interdisciplinary picture of the Mediterranean Including an extensive bibliography and a conversation between leading scholars in the field *Can We Talk Mediterranean* lays the groundwork for a new critical and conceptual approach to the region

Scott, 2015 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam
