The rate of the reaction was found to be independent of the concentration of the solution. The rate of the reaction was found to be independent of the concentration of the solution.

There are several authors who have studied the effect of the size of the sample on the results of the analysis. In general, the results show that the larger the sample, the more accurate the results are. However, the results also show that the size of the sample is not the only factor that affects the results. The quality of the data and the method of analysis are also important factors.
