Cites Commercially Exploited Fish Species Overexploitation:

The Use of CITES for Commercially-exploited Fish Species Solène Guggisberg, 2015-12-11 This book examines the legality adequacy and efficacy of using the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES for commercially exploited fish species and assesses whether the existing institutional cooperation with the Food and Agriculture Organization FAO and regional fisheries management organizations RFMOs is efficient This case study also provides an interesting lens to approaching wider international law issues Indeed finding ways to achieve effective governance of transboundary or global natural resources is central to the peaceful use of oceans and land Furthermore the role of science in advising decision makers is a sensitive issue which deserves scrutiny and is similar in many regimes Finally the complex problem of fragmentation of international law is acute in various fields of environmental law as in all rapidly developing areas of international regulations

Strengthening International Fisheries Law in an Era of Changing Oceans Richard Caddell, Erik J Molenaar, 2019-04-04 This collection addresses the central question of how the current international framework for the regulation of fisheries may be strengthened in order to meet the challenges posed by changing fisheries and ocean conditions in particular climate change International fisheries law has developed significantly since the 1990s through the adoption and establishment of international instruments and bodies at the global and regional levels Global fish stocks nevertheless remain in a troubling state and fisheries management authorities face a wide array of internal and external challenges including operational constraints providing effective management advice in the face of scientific uncertainty and non compliance by States with their international obligations This book examines these challenges and identifies options and pathways to strengthen international fisheries law While it has a primarily legal focus it also features significant contributions from specialists drawn from other disciplines notably fisheries science economics policy and international relations in order to provide a fuller context to the legal policy and management issues raised Rigorous and comprehensive in scope this will be essential reading for lawyers and non lawyers interested in international fisheries regulation in the context of profoundly changing ocean conditions

Implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora through national fisheries legal frameworks Nakamura, J.N. and Kuemlangan, B., 2020-11-11 An increasing number of commercially exploited and managed aquatic species has been listed in the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES triggering the attention from the fisheries sector of States on how listing would impact on the management of the relevant fisheries CITES regulates international trade in certain aquatic species including those which are and can be commercially exploited and which are being managed by the fisheries sector The fisheries sector legal frameworks will have to recognize and enable the various requirements provided for in CITES including the making of non detriment findings and ensuring that there is a designated management authority and scientific authority to take certain decisions in respect of listed

commercially exploited and managed aquatic species This sourcebook provides clarifications on the relationship of CITES with the fisheries sector and provides guidance on how national fisheries legal frameworks can optimize the implementation of CITES The realisation of this sourcebook in 2020 designated as a super year for nature and biodiversity represents a timely and useful contribution to fisheries management by i raising awareness of CITES ii enhancing comprehension of the CITES regime and its relationship with the fisheries sector and iii where a deliberate decision is made by a country to implement CITES through its national fisheries legal frameworks providing guidance as to what do it and how to do it

The Development of the Law of the Sea by UNCLOS Dispute Settlement Bodies Lan Ngoc Nguyen,2023-02-09 A critical assessment of how UNCLOS dispute settlement bodies develop the law the sea and factors that explain such development

International Law of Sharks Erika J. Techera,Natalie Klein,2017-04-18 In *International Law of Sharks* Erika J Techera and Natalie Klein provide an in depth analysis of the current legal frameworks that relate to these important species The authors offer ways in which to overcome obstacles that prevent existing laws from working better and identify best practice global governance options while highlighting opportunities for legal reform Scientific evidence indicates that sharks play a critical role in maintaining marine ecosystem health yet current governance regimes have not been effective and many shark species continue to diminish In this context effective laws are critical to improve sharks conservation status This volume also explores the broader relevance of oceans governance by identifying appropriate legal frameworks and regulatory mechanisms that balance conservation and utilisation of marine species in general

Governance of Marine Fisheries and Biodiversity Conservation Serge M. Garcia,Jake Rice,Anthony Charles,2014-07-15 *Governance of Marine Fisheries and Biodiversity Conservation* explores governance of the world s oceans with a focus on the impacts of two inter connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book s exploration of whether as the streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world s oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject *Governance of Marine Fisheries and Biodiversity Conservation* is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in

all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book

Market Denial and International Fisheries Regulation Darren S. Calley, 2011-10-14 Flag of convenience fishing seriously undermines efforts to protect the marine environment To counter this threat Market Denial and International Fisheries Regulation rests on the logic of the most basic tenet of economics if no market exists for a product then producers will cease to produce Denying market access to the flag of convenience fishing fleet should significantly reduce instances of illegal unreported and unregulated IUU fishing In areas beyond national jurisdiction not only is market denial the most effective means of undermining the IUU fleet it is for most practical purposes the only way to do so To what extent however do the laws of the sea and international trade allow groups of States to close their markets to non compliant fishing vessels

CITES as a Tool for Sustainable Development Marie-Claire Cordonier Segger, David Andrew Wardell, Alexandra Harrington, 2023-08-10 Reviews the key legal and policy innovations along endangered flora and fauna value chains for CITES to promote more sustainable development

Handbook of Fish Biology and Fisheries Paul J. B. Hart, John D. Reynolds, 2008-04-15 Recent decades have witnessed strong declines in fish stocks around the globe amid growing concerns about the impact of fisheries on marine and freshwater biodiversity Fisheries biologists and managers are therefore increasingly asking about aspects of ecology behaviour evolution and biodiversity that were traditionally studied by people working in very separate fields This has highlighted the need to work more closely together in order to help ensure future success both in management and conservation The Handbook of Fish Biology and Fisheries has been written by an international team of scientists and practitioners to provide an overview of the biology of freshwater and marine fish species together with the science that supports fisheries management and conservation This volume subtitled Fisheries focuses on a wide range of topics including the history of fisheries science methods of capture marketing economics major models used in stock assessments and forecasting ecosystem impacts marine protected areas and conservation It builds on material in Volume 1 Fish Biology which ranges from phylogenetics and biogeography to physiology recruitment life histories genetics foraging reproductive behaviour and community ecology Together these books present the state of the art in our understanding of fish biology and fisheries and will serve as valuable references for undergraduates and graduates looking for a comprehensive source on a wide variety of topics in fisheries science They will also be useful to researchers who need up to date reviews of topics that impinge on their fields and decision makers who need to appreciate the scientific background for management and conservation of aquatic ecosystems To order volume II go to the box in the top right hand corner Alternatively to order volume I go to <http://www.blackwellpublishing.com/book.asp/ref/0632054123> or to order the 2 volume set go to <http://www.blackwellpublishing.com/book.asp/ref/0632064838> Provides a unique overview of the study of fish biology and ecology and the assessment and management of fish populations and ecosystems The first volume concentrates

on aspects of fish biology and ecology both at the individual and population levels whilst the second volume addresses the assessment and management of fish populations and ecosystems Written by an international team of expert scientists and practitioners An invaluable reference tool for both students researchers and practitioners working in the fields of fish biology and fisheries

Law and Property in Algeria ,2018-03-20 In spite of its privileged place on the African continent in the Muslim world and in the Middle East and North Africa region Algeria remains poorly known and the works relating to contemporary Algerian society published outside of Algeria are rare This book seeks to contribute to our understanding of Algerian society today through its relationships to property and to law Beyond this the objective is to propose in a comparative perspective proper to anthropology new theoretical and methodological perspectives by which to apprehend the anthropology of law in a Muslim context Algeria as a post colonial and post Socialist State whose population is overwhelmingly Muslim proves to be a particularly interesting case to study Contributors are Hichem Amichi Emilie Barraud Ammar Belhimer Yazid Ben Hounet Nejm Benessaiah Sami Bouarfa Tarik Dahou Baudouin Dupret Marcel Kuper Judith Scheele Alice Wilson
