*Russian Journal of Physical Chemistry* ,2007      *Method for Removing Solid Particulate Material from Within Liquid Fuel Injector Assemblies* ,1998 A method for removing residual solid particulate material from the interior of liquid fuel injectors and other fluid flow control mechanisms having or being operatively associated with a flow regulating fixed or variable orifice. The method comprises the sequential and alternate introduction of columns of a non compressible liquid phase and columns of a compressed gas phase into the body of a fuel injector whereby the expansion of each column of the gas phase across the orifice accelerates the liquid phase in each trailing column of the liquid phase and thereby generates turbulence in each liquid phase for lifting and entraining the solid particulates for the subsequent removal thereof from the body of the fuel injector
