China In The Era Of Xi Jinping Domestic And Foreign Policy Challenges:

China in the Era of Xi Jinping Robert S. Ross, Jo Inge Bekkevold, 2016 In this collection scholars examine the prospects for China's rise and the emergent and unintended consequences posed by China's internal challenges and international assertiveness. The result is a comprehensive analysis of current policy trends in Xi's China and the implications of these developments for his nation, the US and East Asia. *Chinese Politics and Foreign Policy under Xi Jinping* Arthur S.

Ding, Jagannath P. Panda, 2020-11-23 This book focuses on China's future under Xi Jinping's authoritarian leadership by examining various facets of the political, economic, social and foreign policy trajectories of contemporary China. It assesses Xi Jinping's power dynamic as the core leader of the Communist Party of China (CPC) and analyses the impact of Xi's signature domestic policies which demonstrate his political authority within the domestic sphere. Moreover, the book presents Xi's proactive, assertive and action-oriented outlook as a foundation for China's diplomacy in the new era. Bringing together an international set of experts in the field who explore critical facets of China under Xi Jinping that deeply influence the regional as well as the global order, the book investigates the impact of Chinese initiatives such as the Grand Belt and Road Initiative (BRI), the Asian Infrastructure Investment Bank (AIIB) and the BRICS New Development Bank (NDB). Importantly, the book illustrates US-China relations and outlines how this relationship will intensify in the post-COVID-19 era, which is poised to be one of the biggest challenges and turning points of the Asian Century. Offering a timely insight into China's future and the trajectory of Xi Jinping's consolidation of power, this book will be of interest to academics in the fields of China Studies, Asian and International Politics and International Relations. **China's Foreign Policy Contradictions** Tim Nicholas Rühlig, 2022

China's rise to great power status is indisputable, but can it shape the future international order? This question remains widely debated because China's foreign policy is contradictory. Contrary to conventional wisdom, this book shows that China does not act from a position of strength, but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party. Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making, it shows that China will not provide a model for a new international system, but could undermine the existing order. *China in the World Bank, IMF, and WIPO* James Frick, 2025-07-10 Previously one of the least connected states in the world, China is taking on a considerable role as a leading global power. It has participated and benefited from international organizations (IOs) while also influencing their institutional behavior, but it has also demonstrated limited compliance at times. China's behavior has shifted from following the rules to a desire to make and set the rules. *China in the World Bank, IMF and WIPO: Understanding Trends in Global Governance Behavior* explores 40 years of China's participation within these organizations, drawing on in-depth interviews and analysis of annual reports, meeting minutes, consultations and transcripts obtained from archived records to argue how China views its behavior and can achieve its desired interests. James Frick paints a detailed picture to illustrate that in the context of relative

shifts in power variation in China's IO behaviors is predicated by the extent to which IOs conform to China's national interests. This rational behavior approach (RBA) outlines four strategies: rule taking, rule breaking, rule changing, and rulemaking. As China's relative power increases over time, so does its bargaining power, leading to a more assertive rule-changing behavior as it attempts to adapt the organization to allow its ascendancy as a rule maker.

Xi Jinping Alfred L. Chan, 2022. An exploration of all episodes of Xi Jinping's 1953 life history and his political career begun at age 17. Part I explores Xi's formative childhood and youth experience as well as his governance record spanning every administrative level from the village to the capital. Part II focuses on Xi's first five-year term as General Secretary (2012-2017) and as President (2013-2018).

China's Coercion of States in the Asia-Pacific Region Maximilian Ernst, 2025-02-11. This book explains why China chooses to coerce Asia-Pacific regional states despite the risk of such actions creating a backlash and complicating its strategic calculus. China's coercion of neighboring states often a variation of heavy informal economic sanctions combined with diplomatic pressure and gray zone coercive measures has been increasingly observable in the past decade. It has become an important tool in China's foreign policy toolbox and is frequently used by Beijing to shape the security-political environment of the Asia-Pacific. The book begins with an appreciation of China's complicated geopolitical exposition and an understanding that such coercion creates backlash since the target state will likely be alienated and pushed into closer security cooperation with the United States, China's main geopolitical rival. Through two in-depth case studies of Chinese coercion targeting the Philippines and South Korea respectively, the book demonstrates that first the reason China coerces is that the secondary state engages in actions that fundamentally threaten China's security interests, and second, it will coerce these states only if other policy options geared to change the secondary state's course of action have not worked. Employing balance of power theory and particularly wedge strategies, the book solves a pertinent research question and improves our knowledge of contemporary security politics in the Asia-Pacific. This book will be of interest to students, scholars, and practitioners of Asia-Pacific security, Chinese foreign policy, and international relations.

The Political Thought of Xi Jinping Steve Yui-Sang Tsang, Olivia Cheung, 2024. The 20th Congress of the Chinese Communist Party (CCP) held in October 2022 was a historic occasion. It marked the start of Xi Jinping's third term as the top leader of China and ended the post-Mao convention that the top leader retires after serving two terms of five years each. For all intents and purposes, it was also the beginning of Xi's time as leader for life, a development not supposed to recur after the death of Mao Zedong in 1976. It was not meant to be historic in other ways. The meeting took place in Beijing in line with long-standing practices with all the post-Mao institutions and rules in place. It was reassuringly dull and predictable until the last day.

China's Crisis of Success William H. Overholt, 2018-01-11. Explores how China has reached a threshold where continued success requires re-invention of its economy and politics.

The New Motivation and Dilemma of China's Soft Power in the Age of Neopolitik Zheng Li, 2022-05-17. Good governance and anti-corruption efforts were expected to enhance soft power overseas. The party

state successfully governed China for decades relying on its controversial governance approaches The country has visibly demonstrated economic and social development However China s growing influence has failed to be recognised as soft power being viewed rather as sharp power most times The monograph investigates whether China is mindful of exporting its political ideas and whether it considers its governance model to be the pillar of its soft power portfolio Through framing analysis of media coverage and in depth interviews with Australian public diplomacy experts the monograph presents how Australia a western country with close economic ties with China interprets China s intended narrative regarding its governance model and development Examining the congruity between China s projection and Australia s mediation sheds a new light on the relationship between domestic governance soft power and sharp power By sketching out Beijing s ambitions and attempts the monograph draws implications about China s public diplomacy and the future global order [America's China Gamble](#) Paul J. Smith, 2025-07-15 This timely book provides a broad but incisive overview of US policy toward the People s Republic of China from 1949 until the present Paul J Smith argues that any conflict or war between the two nations would have devastating global consequences proposing a mutually beneficial path forward
