Boasians at War Anthony Q. Hazard, Jr., 2020-04-20 This volume seeks to recover a specific historical moment within the tradition of anthropologists trained in the United States under Franz Boas arguably the father of modern American anthropology Focusing on Boasians Ashley Montagu Margaret Mead Melville Herskovits and Ruth Benedict Anthony Hazard highlights the extent to which the Boasians offer historicized explanations of racism that move beyond a quest to reshape only the discipline Boasian war work pointed to the histories of chattel slavery and colonialism to theorize not just race but the emergence of racism as both systemic and interpersonal The realities of race that continue to plague the United States have direct ties to the anthropological work of the figures examined here particularly within the context of the 20th century black freedom struggle Ultimately Boasians at War offers a detailed glimpse of the long troubled history of the concept of race along with the real life realities of racism that have carried on despite the harnessing of scientific knowledge to combat both

Killer Instinct Nadine Weidman, 2021-10-19 A historian of science examines key public debates about the fundamental nature of humans to ask why a polarized discourse about nature versus nurture became so entrenched in the popular sciences of animal and human behavior Are humans innately aggressive or innately cooperative In the 1960s bestselling books enthralled American readers with the startling claim that humans possessed an instinct for violence inherited from primate ancestors Critics responded that humans were inherently loving and altruistic The resulting debate fiercely contested and highly public left a lasting impression on the popular science discourse surrounding what it means to be human Killer Instinct traces how Konrad Lorenz Robert Ardrey and their followers drew on the sciences of animal behavior and paleoanthropology to argue that the aggression instinct drove human evolutionary progress Their message spread throughout popular media brought pointed ripostes Led by the anthropologist Ashley Montagu opponents presented a rival vision of human nature equally based in biological evidence that humans possessed inborn drives toward love and

cooperation Over the course of the debate however each side accused the other of holding an extremist position that behavior was either determined entirely by genes or shaped solely by environment Nadine Weidman shows that what started as a dispute over the innate tendencies of animals and humans transformed into an opposition between nature and nurture This polarized formulation proved powerful When E O Wilson introduced his sociobiology in 1975 he tried to rise above the oppositional terms of the aggression debate But the controversy over Wilson's work led by critics like the feminist biologist Ruth Hubbard was ultimately absorbed back into the nature versus nurture formulation Killer Instinct explores what happens and what gets lost when polemics dominate discussions of the science of human nature

Anatomists of Empire Ross L Jones, 2020-04-17 The 20th century anatomists Grafton Elliot Smith Frederic Wood Jones and Arthur Keith travelled the globe collecting cataloguing and constructing morphologies of the biological world with the aim of weaving these into a new vision of bio ecology that links humans to their deep past as well as their evolutionary niche They dissected human bodies and scrutinised the living explaining for the first time the intricacies of human biology They placed the body in its environment and gave it a history thus creating an ecological synthesis in striking contrast to the model of humanity that they inherited as students Their version of human development and history profoundly influenced public opinion as they wrote prolifically for the press they published bestsellers on human origins and evolution they spoke eloquently at public meetings and on the radio They wanted their anatomical insight to shape public policy And by changing popular views of race and environment they moulded attitudes as to what it meant to be human in a post Darwinian world thus providing a potent critique of racism

The Routledge Handbook of Dehumanization Maria Kronfeldner, 2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator's and the target's perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and
