Conservation Freshwater Fishes Biology Ebook:

Conservation of Freshwater Fishes Gerard P. Closs, Martin Krkosek, Julian D. Olden, 2015-12-03 Freshwater fish are one of the most diverse groups of vertebrates but are also amongst the most threatened. With contributions from leaders in the field this is the first assessment of the global state of freshwater fish diversity synthesising the opportunities, challenges and barriers facing the conservation of freshwater fish biodiversity. The book includes the first global assessment of the number, type and distribution of threatened freshwater fish species, discussing the features of freshwater fish biology and ecology that render so many species vulnerable to extinction. Introductory chapters on why freshwater fish are so sensitive to environmental change and disturbance lead into chapters providing detailed reviews of the key threatening processes and potential solutions. A concluding chapter summarises the key issues and looks to the future for opportunities and challenges for the conservation and management of freshwater fish.

Biology Ebook Raven, 2016-05-16 Biology Ebook Ebook: Biology BROOKER, 2014-09-16 Ebook Biology EBOOK: Teaching for Quality Learning at University John Biggs, Catherine Tang, 2011-09-16 This book is an exceptional introduction to some difficult ideas. It is full of downright good advice for every academic who wants to do something practical to improve his or hers students learning. Paul Ramsden Brisbane Australia. Biggs and Tang present a unified view of university teaching that is both grounded in research and theory and replete with guidance for novice and expert instructors. The book will inspire, challenge, unsettle and in places annoy and even infuriate its readers but it will succeed in helping them think about how high quality teaching can contribute to high quality learning. John Kirby Queens University Ontario Canada. This best selling book explains the concept of constructive alignment used in implementing outcomes based education. Constructive alignment identifies the desired learning outcomes and helps teachers design the teaching and learning activities that will help students to achieve those outcomes and to assess how well those outcomes have been achieved. Each chapter includes tasks that offer a how to manual to implement constructive alignment in your own teaching practices. This new edition draws on the authors experience of consulting on the implementation of constructive alignment in Australia, Hong Kong, Ireland and Malaysia including a wider range of disciplines and teaching contexts. There is also a new section on the evaluation of constructive alignment which is now used worldwide as a framework for good teaching and assessment as it has been shown to assist university teachers who wish to improve the quality of their own teaching, their students learning and their assessment of learning outcomes. Aid staff developers in providing support for departments in line with institutional policies. Provide a framework for administrators interested in quality assurance and enhancement of teaching across the whole university. The authors have also included useful web links to further material. Teaching for Quality Learning at University will be of particular interest to teachers, staff developers and administrators.

EBOOK: Biology Peter Raven, George Johnson, Kenneth Mason, Jonathan Losos, Susan Singer, 2013-02-16 Committed to Excellence in the Landmark Tenth Edition. This edition continues the evolution of Raven Johnson's Biology. The

author team is committed to continually improving the text keeping the student and learning foremost We have integrated new pedagogical features to expand the students learning process and enhance their experience in the ebook This latest edition of the text maintains the clear accessible and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology and have been enhanced in this landmark Tenth edition This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular molecular biology and genomics to offer our readers a text that is student friendly and current Our author team is committed to producing the best possible text for both student and faculty The lead author Kenneth Mason University of Iowa has taught majors biology at three different major public universities for more than fifteen years Jonathan Losos Harvard University is at the cutting edge of evolutionary biology research and Susan Singer Carleton College has been involved in science education policy issues on a national level All three authors bring varied instructional and content expertise to the tenth edition of *Biology Ecological Sustainability of Fish Resources of Inland Waters of the Western Balkans* Vladica Simić, Snežana Simić, Vladimir Pešić, 2023-12-31 This book provides a detailed evaluation of the hydro ecological characteristics of the Western Balkans an area characterized by still preserved inland waters and fish resources important for the European continent as well as the biodiversity of inland waters important for the planet Earth Freshwater ecosystems cover only 1% of the Earth s surface however they are a habitat for about 40% of fish species At the same time inland fisheries make less than 12% of the world s global fish catch with 43% coming from low income and food deficient countries Africa South America Southeast Asia In Europe the Western Balkans have significant fishing waters and fish resources including the Middle Danube drainage Sava Drina Velika Morava river systems large ancient lakes Skadar Shkodra Ohrid Prespa Dojran and the Adriatic basin characterized by endemic and commercially important species However in contrast to the high fishing potential in a significant part of the Western Balkans diverse and specific political economic and social factors largely had a negative impact on the state of fish resources This volume is multidisciplinary and provides a sound knowledge base for scientific and practical fisheries In addition it may be a valuable guide for managers and conservationists worldwide to adapt methods and procedures for the ecological sustainability of fish resources under specific local natural and socio economic conditions Finally the content is a good reference for natural sciences and agriculture students studying fish fish resources and fisheries sciences It would improve their knowledge and perspectives on the challenges of sustainable use and conservation of inland water resources

Extremophile Fishes Rüdiger Riesch, Michael Tobler, Martin Plath, 2015-01-24 This book summarizes the key adaptations enabling extremophile fishes to survive under harsh environmental conditions It reviews the most recent research on acidic Antarctic cave desert hypersaline hypoxic temporary and fast flowing habitats as well as naturally and anthropogenically toxic waters while pointing out generalities that are evident across different study systems Knowledge of the different

adaptations that allow fish to cope with stressful environmental conditions furthers our understanding of basic physiological ecological and evolutionary principles In several cases evidence is provided for how the adaptation to extreme environments promotes the emergence of new species Furthermore a link is made to conservation biology and how human activities have exacerbated existing extreme environments and created new ones The book concludes with a discussion of major open questions in our understanding of the ecology and evolution of life in extreme environments
