Isaac Newton: Philosophical Writings Isaac Newton, 2004-11-04 Andrew Janiak examines Newton's philosophical positions and his relations to canonical figures in early modern philosophy through Newton's principal philosophical writings. Janiak's study includes excerpts from the *Principia* and the *Opticks*, Newton's famous correspondence with Boyle and with Bentley, and his equally significant correspondence with Leibniz, often ignored in favor of Leibniz's later debate with Samuel Clarke. Newton's exchanges with Leibniz place their different understandings of natural philosophy in sharp relief.

Newton: Philosophical Writings Andrew Janiak, 2014-08-14 Sir Isaac Newton 1642-1727 left a voluminous legacy of writings. Despite his influence on the early modern period, his correspondence, manuscripts, and publications in natural philosophy remain scattered throughout many disparate editions. In this volume, Newton's principal philosophical writings, including excerpts from the *Principia* and the *Opticks* and a corrected translation of *De Gravitatione*, are collected in a single place. This newly expanded second edition of *Philosophical Writings* contains new excerpts from Newton's earliest optical writings, some of his unpublished reflections on the interpretation of Scriptural passages that concern the Earth's motion, and his correspondence with important figures in his day, including the theologian Richard Bentley, the mathematician Roger Cotes, and the philosopher G. W. Leibniz. The excerpts show in depth how Newton developed a number of highly controversial views concerning space, time, motion, and matter, and then defended them against the withering criticisms of his contemporaries.
