Citizenship In A Global Age Society Culture Politics:

Citizenship in a Global Age Gerard Delanty, 2000 Citizenship in a Global Age provides a comprehensive and concise overview of the main debates on citizenship and the implications of globalization. It argues that citizenship is no longer defined by nationality and the nation state but has become de-territorialized and fragmented into the separate discourses of rights, participation, responsibility, and identity. Gerard Delanty claims that cosmopolitanism is increasingly becoming a significant force in the global world due to new expressions of cultural identity, civic ties, human rights, technological innovations, ecological sustainability, and political mobilization. Citizenship is no longer exclusively about the struggle for social equality but has become a major site of battles over cultural identity and demands for the recognition of group difference. Delanty argues that globalization both threatens and supports cosmopolitan citizenship. Critical of the prospects for a global civil society, he defends the alternative idea of a more limited cosmopolitan public sphere as a basis for new kinds of citizenship that have emerged in a global age. International Migration and Ethnic Relations Magnus Dahlstedt, Anders Neergaard, 2015-05-22 Each day in so many aspects of daily life we are reminded of the significance of migration and ethnicity. This book is a critical contribution to the understanding of the phenomena of migration and ethnicity from a Swedish vantage point looking outwards towards a European context. It presents current academic debates and gives a theoretical overview of nine key concepts in the field of ethnic and migrations studies but it also exemplifies how these concepts could be used in analysing specific empirical cases. It explores the following concepts: ethnicity, migration, diaspora, citizenship, intersectionality, racism, right wing populism, social exclusion, and informalisation. The book is interdisciplinary, embracing areas such as labour studies, economic history, ethnicity, business administration, gender studies, literature studies, economics, educational science, social anthropology, social work, sociology, and political science.

Global Ethics and Civil Society Darren O'Byrne, 2017-03-02 This detailed and timely volume examines the impact of global transformations on concepts of civil society. Divided into two sections, it evaluates changing notions of ethics and how these transformations are operationalized. The first part deals with the theoretical aspects while the second examines the practical impact of the evolution of global ethics and norms on society. Providing solid case studies, this accessible volume contributes to the theoretical literature in the field and will prove a useful library reference work or graduate reader in the areas of globalization, civil society, ethics, human rights, citizenship, and cosmopolitanism.

In Search of the Good Life Fred Dallmayr, 2007-08-31 The great German novelist Thomas Mann implored readers to resist the persistent and growing militarism of the mid twentieth century. To whom should we turn for guidance during this current era of global violence, political corruption, economic inequality, and environmental degradation? For more than two millennia the world's great thinkers have held that the ethically good life is the highest purpose of human existence. Renowned political philosopher Fred Dallmayr traces the development of this notion, finding surprising connections among Aristotelian ethics, Abrahamic and

Eastern religious traditions German idealism and postindustrial social criticism In Search of the Good Life does not offer a blueprint but rather invites readers on a cross cultural quest Along the way the author discusses the teachings of Aristotle Confucius Nicolaus of Cusa Leibniz and Schiller in addition invoking more recent writings of Gadamer and Ricoeur as guideposts and sources of hope during our troubled times Among contemporary themes Dallmayr discusses are the role of the classics in education proper and improper ways of spreading democracy globally the possibility of transnational citizenship the problem of politicized evil and the role of religion in our predominantly secular culture Dallmayr restores the notion of the good life as a hallmark of personal conduct civic virtue and political engagement and as the road map to enduring peace In Search of the Good Life seeks to arouse complacent and dispirited citizens guiding them out of the distractions of shallow amusements and perilous resentments in the direction of mutual learning and civic pedagogy a direction that will enable them to impose accountability on political leaders who stray from fundamental ethical standards

Greening Citizenship A. Scerri, 2012-08-21 The greening of citizenship the state and ideology has created both opportunities and bottlenecks for progressive political movements Scerri argues that these are pursuing justice by making holistic demands for fair distribution and status recognition adequate representation and effective participation **Citizens Without Frontiers** Engin F. Isin, 2012-11-02 States define who their citizens are and exert control over their life and movements But how does such power persist in a global world where people ideas and products constantly cross the borders of what the states see as their sovereign territory This groundbreaking work sets to examine and interprets such challenges to offer a new way of thinking about citizenship Abandoning the sovereignty principle it develops a new image of citizenship using the connectedness principle To do so it interprets acts of citizenship by following activist citizens across the world through case studies from Wikileaks and the Gaza flotilla to China's virtual world and Darfur Written by a leader in the field this accessible and original work imagines citizens without frontiers as a politics without community and belonging inclusion without exclusion where the frontier becomes a form of otherness that citizens erase or create This unique work brings forth a new and creative way to approach citizenship beyond boundaries that will appeal to anyone studying citizenship social movements and migration *Globalisation, Cultural Identity and Nation-Building* Joseph Zajda, Suzanne Majhanovich, 2021-02-11 This book critiques dominant discourses and debates pertaining to cultural identity set against the current backdrop of growing social stratification and unequal access to quality education It addresses current discourses concerning globalisation ideologies and the state as well as approaches to constructing national ethnic and religious identities in the global culture It explores the ambivalent and problematic connections between the state globalisation the construction of cultural identity and the nation building process also in connection with history education and the history textbooks used in schools The book also explores conceptual frameworks and methodological approaches applicable to research on the state globalisation nation building and identity politics Drawing on diverse paradigms ranging from critical

theory to globalisation the book by focusing on globalisation ideology and cultural identity critically examines recent research in history education and its impact of identity politics as well as the most significant dimensions defining and contextualising the processes surrounding nation building and identity politics globally Given the need for a multiple perspective approach the authors who have diverse backgrounds and hail from different countries and regions offer a wealth of insights contributing to a more holistic understanding of the nexus between the nation state and national identity

Sexuality and Citizenship Diane Richardson, 2017-09-18 Sexual citizenship has become a key concept in the social sciences It describes the rights and responsibilities of citizens in sexual and intimate life including debates over equal marriage and women's human rights as well as shaping thinking about citizenship more generally But what does it mean in a continually changing political landscape of gender and sexuality In this timely intervention Diane Richardson examines the normative underpinnings and varied critiques of sexual citizenship asking what they mean for its future conceptual and empirical development as well as for political activism Clearly written the book shows how the field of sexuality and citizenship connects to a range of important areas of debate including understandings of nationalism identity neoliberalism equality governmentality individualization colonialism human rights globalization and economic justice Ultimately this book calls for a critical rethink of sexual citizenship Illustrating her argument with examples drawn from across the globe Richardson contends that this is essential if scholars want to understand the sexual politics that made the field of sexuality and citizenship studies what it is today and to enable future analyses of the sexual inequalities that continue to mark the global order
