Cloning Christ A Challenge Of Science And Faith:

Cloning Human Beings: Commissioned papers United States. National Bioethics Advisory Commission,1997

Cloning Human Beings United States. National Bioethics Advisory Commission,1997 **Cloning Terror** W. J. T.

Mitchell,2011 The phrase War on Terror has quietly been retired from official usage but it persists in the American psyche and our understanding of it is hardly complete Exploring the role of verbal and visual images in the War on Terror the author finds a conflict whose shaky metaphoric and imaginary conception has created its own reality Christ Clone David McLeod,2010-09-01 In this gripping thriller the challenge goes out clone Jesus Christ Can science make a leap of faith A wealthy businessman issues a global challenge to all biotechnology corporations clone Jesus Christ As precious artefacts the spearhead reputed to have been used to stab Jesus on the cross a piece of the cross itself and the Shroud of Turin go missing from churches and private collections around the world three scientific groups start their top secret experiments Across town Michael Malone is a broken man Once a respected priest husband and father to a beautiful daughter named Mary he now spends most of his time in a bar drinking to drown the memory of the past The unfortunate chain of events he is so desperate to forget began years before with the abduction of his daughter and resulted in the loss of his wife and his faith From behind the bar a TV news item brings his terrible memories flooding back Malone embarks on a renewed quest to find his daughter unaware of the extraordinary things that lie ahead **The CRISPR Revolution in Science, Religion, and Ethics** Arvin M. Gouw,Ted Peters,2025-01-23 This collection of original essays by scientists theologians religious studies scholars and ethicists offers an authoritative illuminating and thought provoking overview of the CRISPR controversy Genetic science at times ignites explosions of public controversy In the early 1990s the Human Genome Project along with Jurassic Park frightened the world with genetic determinism The cloning controversy of 1997 and the stem cell controversy of 1998 prompted bitter moral stand offs The fuse has just been lit for the next explosion the CRISPR controversy The CRISPR Revolution in Science Religion and Ethics channels the energy of that explosion into constructive reflection on the implications of this revolutionary science for religion ethics and public policy Chapters accessibly explain the science behind gene editing and draw out its implications for social impact This volume reviews the history of genomics from 1990 to date with special attention to cloning and stem cell research Contributors address the significance of gene technology for understanding human nature within specific religious traditions Most importantly they analyze selected ethical issues therapy versus enhancement germ line modification designer children patenting and the long term effects of gene drive proposals *Christ, Creation, and the Fall* Simon R. Watson,2021-05-03 If the Christian God is creator of all things and revealed in Christ to be compassionate love then how can divine agency in creation be understood considering the Darwinian assertion that biological warfare undergirds natural selection The implications are significant for understanding Christian discipleship and ethics if indeed the human is made in God s image with the capacity for creative or destructive dominion

over earthly life Gen 1 26 To approach this challenge Simon R Watson turns to Philip Hefner s *The Human Factor* 1993 which identifies the human as created co creator to investigate themes of freedom and determinism in light of Darwinian evolutionary theory Hefner s argument exploring human purpose from a beneficence discernible in creation invites a re examination of Victorian preoccupations with natural teleology Inspired by Hefner s work Watson places Darwin s *The Descent of Man* 1871 in conversation with historical and contemporary sources from William Paley s *Natural Theology* 1802 to twenty first century articulations of Wisdom Christology by Denis Edwards and Elizabeth Johnson to argue that theology can offer a framework of meaning to interpret an evolving nature as revelatory of a Christian God when considered through the lens of a suffering Christ and an existentially fallen creation *The End That Does* Cathy Gutierrez,Hillel Schwartz,2014-12-18 Millennial movements have had a significant impact on history and lie behind many artistic and scientific views of the world *The End that Does* tracks the interplay of the arts sciences and millennial imagination across 3000 years The volume presents essays ranging across the study of ancient ritualistic sacrifice utopian technology and the American millennial dream science fiction and the apocalypse of the tabloids *The End that Does* will be invaluable to any student or scholar interested in the history of millennialism **Religion and the Implications of Radical Life Extension** C. Mercer,D. Maher,2009-08-31 If the science of radical life extension is realized and the technology becomes widely available it would arguably have a more radical impact on humanity than any other development in history This book is the first concerted effort to explore implications of radical life extension from the perspective of the world s major religious traditions **Beyond Cloning** Ronald Cole-Turner,2001-02-01 This book examines the ways that Christians from a variety of different confessions can respond to the issue of genetic engineering *Perspectives on Science and Christian Faith* ,2007
