Clovis Caches Recent Discoveries And New Research:

Clovis Caches Bruce B. Huckell, J. David Kilby, 2014-05-01 A unique significant contribution to our maturing studies of the Clovis era Gary Haynes author of *The Early Settlement of North America* The Clovis Era The Paleoindian Clovis culture is known for distinctive stone and bone tools often associated with mammoth and bison remains dating back some 13 500 years While the term Clovis is known to every archaeology student few books have detailed the specifics of Clovis archaeology This collection of essays investigates caches of Clovis tools many of which have only recently come to light These caches are time capsules that allow archaeologists to examine Clovis tools at earlier stages of manufacture than the broken and discarded artifacts typically recovered from other sites The studies comprising this volume treat methodological and theoretical issues including the recognition of Clovis caches Clovis lithic technology mobility and land use **In the Country of the Kaw**

James H. Locklear, 2024-04-18 Gathering its waters from the plains of Colorado Kansas and Nebraska the Kaw is truly America's prairie river the only one to arise entirely on the Great Plains and traverse all three major grasslands shortgrass mixed grass and tallgrass prairies James Locklear's *In the Country of the Kaw* is a joyous exploration of the realm of the Kaw River which stretches from the High Plains of Colorado to the Kansas City metropolitan area The book's first section profiles geology landforms and the region's woodlands and grasslands The second explores the rich biological diversity associated with the land and its inhabitants remarkable adaptations to the environment and each other The final section is a collection of stories of human interaction with the landscape how nature has shaped culture and culture nature Locklear finds astonishments at every turn *In the Country of the Kaw* is also a call to seek the flourishing of the natural and human communities of the region Locklear describes staggering human wrought environmental degradations but also finds great hope in the resilience of Nature and the inspiring work of conservation preservation restoration and renewal being accomplished by individuals and organizations throughout the region Locklear's relationship with the country of the Kaw stretches from his childhood in Kansas City in the 1960s to his current professional life as a botanist working in the Great Plains A half century of rambling and rooting around in this region has given him a deep awe and affection for its uniqueness and goodness which he conveys to the reader on every page Lithic Technological Organization and Paleoenvironmental Change

Erick Robinson, Frédéric Sellet, 2017-11-06 The objective of this edited volume is to bring together a diverse set of analyses to document how small scale societies responded to paleoenvironmental change based on the evidence of their lithic technologies The contributions bring together an international forum for interpreting changes in technological organization embracing a wide range of time periods geographic regions and methodological approaches As technology brings more refined information on ancient climates the research on spatial and temporal variability of paleoenvironmental changes In turn this has also broadened considerations of the many ways that prehistoric hunter gatherers may have responded to fluctuations in resource bases From an archaeological perspective stone tools and their associated debitage provide clues to

understanding these past choices and decisions and help to further the investigation into how variable human responses may have been. Despite significant advances in the theory and methodology of lithic technological analysis there have been few attempts to link these developments to paleoenvironmental research on a global scale. *First Peoples in a New World* David J. Meltzer, 2021-10-07. A study of Ice Age Americans highlighting genetic archaeological and geological evidence that has revolutionized our understanding of their origins, antiquity and adaptations. Convergent Evolution in Stone-Tool Technology Michael J. O'Brien, Briggs Buchanan, Metin I. Eren, 2018-04-20. Scholars from a variety of disciplines consider cases of convergence in lithic technology when functional or developmental constraints result in similar forms in independent lineages. Hominins began using stone tools at least 2.6 million years ago, perhaps even 3.4 million years ago. Given the nearly ubiquitous use of stone tools by humans and their ancestors, the study of lithic technology offers an important line of inquiry into questions of evolution and behavior. This book examines convergence in stone tool making cases in which functional or developmental constraints result in similar forms in independent lineages. Identifying examples of convergence and distinguishing convergence from divergence refutes hypotheses that suggest physical or cultural connection between far-flung prehistoric toolmakers. Employing phylogenetic analysis and stone tool replication, the contributors show that similarity of tools can be caused by such common constraints as the fracture properties of stone or adaptive challenges rather than such unlikely phenomena as migration of toolmakers over an Arctic ice shelf. Contributors: R. Alexander Bentley, Briggs Buchanan, Marcelo Cardillo, Mathieu Charbonneau, Judith Charlin, Chris Clarkson, Loren G. Davis, Metin I. Eren, Peter Hiscock, Thomas A. Jennings, Steven L. Kuhn, Daniel E. Lieberman, George R. McGhee, Alex Mackay, Michael J. O'Brien, Charlotte D. Pevny, Ceri Shipton, Ashley M. Smallwood, Heather Smith, Jayne Wilkins, Samuel C. Willis, Nicolas Zayns. The Archaeology of the North American Great Plains Douglas B. Bamforth, 2021-09-23. This book uses archaeology to tell 15,000 years of history of the indigenous people of the North American Great Plains. *The Oxford Handbook of Archaeological Network Research* Tom Brughmans, Barbara J. Mills, Jessica Munson, Matthew A. Peeples, 2024. This Handbook is the first authoritative reference work for archaeological network research, featuring current topical trends and covering the archaeological application of network methods and theories. The Archaeology of Large-Scale Manipulation of Prey Kristen A. Carlson, Leland C. Bement, 2018-05-30. The Archaeology of Large Scale Manipulation of Prey explores the social and functional aspects of large scale hunting adaptations in the archaeological record. Mass kill hunting strategies are ubiquitous in human prehistory and exhibit culturally specific economic, social, environmental and demographic markers. Here seven case studies, primarily from the Americas and spanning from the Folsom period on the Great Plains to the ethnographic present in Australia, expand the understanding of large scale hunting methods beyond the customary role of subsistence and survival to include the social and political realms within which large scale hunting adaptations evolved. Addressing a diverse assortment of archaeological issues relating to the archaeological signatures and interpretation of mass kill sites. *The Archaeology of Large Scale*

Manipulation of Prey reevaluates and rephrases the deep time development of hunting and the themes of subsistence to provide a foundation for the future study of hunting adaptations around the globe. Authors illustrate various perspectives and avenues of investigation making this an important contribution to the field of zooarchaeology and the study of hunter-gatherer societies throughout history. The book will appeal to archaeologists, ethnologists, and ecologists alike. Contributors: Jane Balme, Jonathan Driver, Adam C. Graves, David Maxwell, Ulla Odgaard, John D. Speth, María Nieves Zedeo. Clovis Ashley M. Smallwood, Thomas A. Jennings, 2014-12-08. New research and the discovery of multiple archaeological sites predating the established age of Clovis 13,000 years ago provide evidence that the Americas were first colonized at least one thousand to two thousand years before Clovis. These revelations indicate to researchers that the peopling of the Americas was perhaps a more complex process than previously thought. The Clovis culture remains the benchmark for chronological, technological, and adaptive comparisons in research on peopling of the Americas. In *Clovis: On the Edge of a New Understanding*, volume editors Ashley Smallwood and Thomas Jennings bring together the work of many researchers actively studying the Clovis complex. The contributing authors presented earlier versions of these chapters at the Clovis Current Perspectives on Chronology, Technology, and Adaptations symposium held at the 2011 Society for American Archaeology meetings in Sacramento, California. In seventeen chapters, the researchers provide their current perspectives of the Clovis archaeological record as they address the question: What is and what is not Clovis. **Diversity in Open-Air Site Structure across the Pleistocene/Holocene Boundary** Kristen A. Carlson, Leland C. Bement, 2022-08-12. Archaeological research on the late Pleistocene and early Holocene periods has tended to focus on rock shelters, caves, large game kills, and occasionally butchery sites. *Diversity in Open Air Site Structure across the Pleistocene-Holocene Boundary* examines a diverse range of open air sites bounded both naturally and culturally in Siberia and Germany and throughout North America. Open air sites are difficult for researchers to locate and because of depositional processes, often more difficult to interpret, they contain many superimposed events but often show evidence of only the most recent. Working to overcome the limitations of data and poor preservation, using decades of prior research and new analytical tools, and diverging from a one-size-fits-all mode of interpretation, the contributors to this volume offer fresh insight into the formation and taphonomy of open air sites.
