Chapters have been added on screening and brief intervention reflecting the development of brief screening tools and research on the efficacy of interventions and the role of recovery in chronic care disease management; specifically, what the treatment models for alcohol dependence and for diabetes can effectively borrow from each other. A new chapter focuses on the treatment of alcohol intoxication and withdrawal, the first steps in treatment of alcohol use disorder. Two chapters on marijuana, one on the neurobiology and one addressing treatment, have been added. Given the accelerating trend toward decriminalization and legalization of this substance, clinicians will find this information of increasing importance.
