A Contemporary Approach to Clinical Supervision Liat Shklarski, Allison Abrams, 2021-07-11 The most critical and influential relationship affecting one's growth as a mental health professional is the relationship between the clinician and the supervisor. Good supervisors breed good therapists. This book goes beyond facts and figures to provide an innovative perspective on the supervision process. Through contributions by seven supervisees and the supervisor they all shared, readers are offered a rare glimpse into what takes place during the supervision hour. This book not only offers insight into the elements integral to effective supervision but also teaches about the supervisory relationship. With contributors from various disciplines, theoretical orientations, and cultures, it shows how the supervisee and supervisor are able to navigate these differences while still gaining the most from supervision. Topics that are covered include cultural competence in multicultural supervision and remote supervision when it is conducted between clinicians in different countries, as well as an original study by the authors on the experiences of supervisees during the global Covid 19 pandemic and the transition to remote supervision. For mental health professionals who are training to be supervisors or experienced supervisors looking to improve their skills, this book will serve as an invaluable resource for professional development.

Supervision in Psychoanalysis and Psychotherapy Diana Shmukler, 2016-09-13 Supervision in Psychoanalysis and Psychotherapy demonstrates why supervision is an essential component of any psychoanalytic or therapeutic work. Drawing on Winnicott and rich clinical material, and featuring work with Patrick Casement, this book provides new guidance on psychodynamic supervision and explores how its skilful use can have a significant effect on the outcome of such work, enabling the practitioner to rethink their theoretical approach and thereby view issues differently in the clinical setting. Built around the case study of a challenging but successful long-term individual therapy, Supervision in Psychoanalysis and Psychotherapy examines how clinicians can become stuck in their work with certain patients, struggling to find a way to get through to them. Diana Shmukler brings together a fascinating combination of various perspectives, detailing the patient's own words, the therapist's views and reflections, and the effect of a brief introduction to Art Therapy whilst underlining the power and impact both theoretically and practically of using a

different approach in supervision Shmukler superbly integrates theory and practice underlining the validity of a two person psychology and the therapeutic relationship whilst also illustrating the centrality of both participants commitment to and belief in the process of therapy Importantly the book provides a clinical example in which the subjectivities of all the participants are shown to be clearly central to the work Shmukler underlines the significance of supervision to complex cases even that of a highly experienced therapist Supervision in Psychoanalysis and Psychotherapy will appeal to psychoanalysts and psychotherapists students and trainees in integrative psychotherapy counsellors and psychiatrists as well as patients seeking help for deep seated issues

Leopold Caligor, Phillip M. Bromberg, James D. Meltzer, 2013-11-11 In order to complete training successfully every psychoanalyst has to be a supervisee This experience leads each analyst to want to become a supervisor Until recently very little has been discussed about what supervision is how it is done and how it is related to the various theories of psychoanalysis that are held as articles of faith The 1980 1981 program of the William Alanson White Psychoanalytic Society was devoted to supervision with representatives of various schools demonstrating their ways of doing consultations with analysts about patients This book is an extension of that endeavor In it supervisors of various persuasions discuss this topic The editors Leopold Caligor Philip M Bromberg and James D Meltzer are to be congratulated for the high level of discourse represented by the various chapters They are to be commended as well about the eloquent statement this book makes namely there are many answers and approaches and no final answer to the questions raised by the volume
