Discovering Hidden Gems in Foreign Languages M.D. Miller, 2023-04-27

This book offers a practical approach to conducting research in foreign languages on topics with a global nexus

It introduces the problem researchers face when getting started with a research problem such as setting up the research environment and establishing goals for the research

The researcher then needs to prepare and to conduct foreign language research by generating key terms and searching the right places where the information they seek is most likely to be stored

Using the appropriate advanced search operators the researcher narrows down the search results to the desired sources thereby eliminating the irrelevant sources

Specialized knowledge of country specific domains advances the specificity and relevance of the researcher's efforts

The methods and tools demonstrated in this book are applicable to a variety of academic and practical fields

A doctor may ask what are other experts in my field saying about ABC disease

A sommelier may ask where else in the world are XYZ grape varieties grown

A businessman may ask who are my global competitors in my market

A doctoral student may ask have any other students at universities abroad ever written a dissertation about my topic too

With the tools and techniques demonstrated in this book all of these questions are answerable

This book concludes with chapters

on translation and citation methods and includes three case studies that demonstrate the practical use of the methods discussed above This book targets academic researchers as well as students and faculty This book will also be a good fit as an assigned reading for a college course on thesis dissertation research

Analysis and Visualization of Citation Networks Dangzhi Zhao, Andreas Strotmann, 2022-06-01 Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research management or information service issues such as university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization Table of Contents Acknowledgment Dedications Foundations of Citation Analysis Conducting Citation Network Analysis Steps Concepts Techniques and Tools Field Delineation and Data Sources for Citation Analysis Disambiguation in Citation Network Analysis Visualization of Citation Networks Appendix 3 3 Appendix 5 4 2 Bibliography Author Biographies **Harvard Oriental Series** ,1915
