C3 January 2014 Mark Scheme:

Dream Hoarders Richard V. Reeves, 2017-05-23 *Dream Hoarders* sparked a national conversation on the dangerous separation between the upper middle class and everyone else. Now in paperback and newly updated for the age of Trump, Brookings Institution senior fellow Richard Reeves is continuing to challenge the class system in America. In America, everyone knows that the top 1 percent are the villains. The rest of us, the 99 percent, we are the good guys. Not so, argues Reeves. The real class divide is not between the upper class and the upper middle class; it is between the upper middle class and everyone else. The separation of the upper middle class from everyone else is both economic and social, and the practice of opportunity hoarding—gaining exclusive access to scarce resources—is especially prevalent among parents who want to perpetuate privilege to the benefit of their children. While many families believe this is just good parenting, it is actually hurting others by reducing their chances of securing these opportunities. There is a glass floor created for each affluent child, helped by his or her wealthy stable family. That glass floor is a glass ceiling for another child. Throughout *Dream Hoarders*, Reeves explores the creation and perpetuation of opportunity hoarding and what should be done to stop it, including controversial solutions such as ending legacy admissions to school. He offers specific steps toward reducing inequality and asks the upper middle class to pay for it. Convinced of their merit, members of the upper middle class believe they are entitled to those tax breaks and hoarded opportunities. After all, they aren't the 1 percent. The national obsession with the super rich allows the upper middle class to convince themselves that they are just like the rest of America. In *Dream Hoarders*, Reeves argues that in many ways they are worse, and that changes in policy and social conscience are the only way to fix the broken system.

Third-Party Certifiers Jan De Bruyne, 2019-07-12 *Third Party Certifiers* Jan De Bruyne. Third party certifiers are organisations that are independent of a requesting entity. They attest that a product, service, information, or person possesses certain qualifications or meets safety, quality, or technical standards. This important book presents an in-depth analysis of the liability and obligations of certifiers, evaluates existing certification processes in selected fields, and proposes new mechanisms which could increase the accuracy and reliability of certifiers' ratings, marks, or reports. Highlighting the risks of errors in this activity, inaccurate certification was a major factor in the global financial crisis of 2008. The author takes a comparative approach, looking at the certification process in several European countries, Australia, and the United States. Such aspects of the process as the following are thoroughly described: obligations and liability of certifiers during the certification process; risk of information asymmetry between the requesting entity and the end user; and relationship between the civil liability of certifiers and public law aspects. The analysis includes detailed research on key industries and jurisdictions, and a specific proposed framework for more accurate and reliable certification. Because the efficient and effective functioning of third party certifiers is extremely important in today's world, especially in such areas as health, the environment, safety, or economic values, this deeply researched contribution to an important area of commercial

law combining analysis of current issues with proposed reforms will be welcomed by practitioners when confronted with legal issues with regard to the certification process The book s conceptual framework will also prove highly useful for policymakers charged with developing reliable certification mechanisms

Discrimination, Vulnerable Consumers and Financial Inclusion Cătălin-Gabriel Stănescu, Asress Adimi Gikay, 2020-12-28 This book addresses the questions of discrimination vulnerable consumers and financial inclusion in the light of the emerging legal socioeconomic and technological challenges New technologies such as artificial intelligence driven consumer credit risk assessment and Fintech platforms the changing nature of vulnerability due to the ongoing COVID 19 pandemic as well as the sophistication of digital technologies which help circumvent legal barriers and protections necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges Organized in two major parts the first addresses from multiple national angles the idea of a human rights approach to consumer law in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt induced servitude The second tackles the challenges posed by increased usage of technology in connection with financial services which tends to solve but also creates additional issues for consumers in general and for vulnerable groups in particular
