Computability Complexity And Constructivity In Economic Analysis:

Computability, Complexity and Constructivity in Economic Analysis K. Vela Velupillai, 2005-05-13 This cutting edge collection of essays develops an economic theory based on the mathematics of the digital computer A cutting edge collection of essays which develops an economic theory based on the mathematics of the digital computer Proposes a wholly different mathematical foundation for economic theory and applied economics The contributors supply explicit formalizations and applications to traditional issues in economic analysis Each chapter presents new theoretical perspectives and results and novel conceptual definitions

Computable, Constructive and Behavioural Economic Dynamics Stefano Zambelli, 2010-02-25 The book contains thirty original articles dealing with important aspects of theoretical as well as applied economic theory While the principal focus is on the computational and algorithmic nature of economic dynamics individual as well as collective decision process and rational behavior some contributions emphasize also the importance of classical recursion theory and constructive mathematics for dynamical systems business cycles theories growth theories and others are in the area of history of thought methodology and behavioural economics The contributors range from Nobel Laureates to the promising new generation of innovative thinkers This volume is also a Festschrift in honour of Professor Kumaraswamy Vela Velupillai the founder of Computable Economics a growing field of research where important results stemming from classical recursion theory and constructive mathematics are applied to economic theory The aim and hope is to provide new tools for economic modelling This book will be of particular appeal to postgraduate students and scholars in one or more of the following fields computable economics business cycles macroeconomics growth theories methodology behavioural economics financial economics experimental and agent based economics It might be also of importance to those interested on the general theme of algorithmic foundations for social sciences

Nonlinearity, Complexity and Randomness in Economics Stefano Zambelli, Donald A. R. George, 2012-01-17 Nonlinearity Complexity and Randomness in Economics presents a variety of papers by leading economists scientists and philosophers who focus on different aspects of nonlinearity complexity and randomness and their implications for economics A theme of the book is that economics should be based on algorithmic computable mathematical foundations Features an interdisciplinary collection of papers by economists scientists and philosophers Presents new approaches to macroeconomic modelling agent based modelling financial markets and emergent complexity Reveals how economics today must be based on algorithmic computable mathematical foundations

The Oxford Handbook of Computational Economics and Finance Shu-Heng Chen, Mak Kaboudan, Ye-Rong Du, 2018-01-12 The Oxford Handbook of Computational Economics and Finance provides a survey of both the foundations of and recent advances in the frontiers of analysis and action It is both historically and interdisciplinarily rich and also tightly connected to the rise of digital society It begins with the conventional view of computational economics including recent algorithmic development in computing rational expectations volatility and general equilibrium It then moves from traditional computing

in economics and finance to recent developments in natural computing including applications of nature inspired intelligence genetic programming swarm intelligence and fuzzy logic Also examined are recent developments of network and agent based computing in economics How these approaches are applied is examined in chapters on such subjects as trading robots and automated markets The last part deals with the epistemology of simulation in its trinity form with the integration of simulation computation and dynamics Distinctive is the focus on natural computationalism and the examination of the implications of intelligent machines for the future of computational economics and finance Not merely individual robots but whole integrated systems are extending their immigration to the world of Homo sapiens or symbiogenesis *Keynesian, Sraffian, Computable and Dynamic Economics* Kumaraswamy Velupillai, 2021-03-08 This book explores an alternative approach to the conventional market based view of economic theory and economic policy at theoretical numerical and applicable levels The chapters provide a theoretical empirical and algorithmic approach to marcodynamics Sraffian economics and current policy issues Post Keynesian macroeconomics business cycle theory the trade cycle microfoundations and the Philips Machine are also covered This book aims to challenge orthodox ideas and provide a lens through which to honour the work of Stefano Zambelli It will be of relevant to students and academics interested in economics Foundations and Applications of Complexity Economics J. Barkley Rosser, Jr., 2021-05-21 This book presents a survey of the aspects of economic complexity with a focus on foundational interdisciplinary ideas The long awaited follow up to his 2011 volume *Complex Evolutionary Dynamics in Urban Regional and Ecologic Economic Systems From Catastrophe to Chaos and Beyond* this volume draws together the threads of Rosser's earlier work on complexity theory and its wide applications in economics and an expanded list of related disciplines The book begins with a full account of the broader categories of complexity in economics dynamic computational hierarchical and structural before shifting to more detailed analysis The next two chapters address problems associated with computational complexity especially those of computability and discuss the Godel Incompleteness Theorem with a focus on reflexivity The middle chapters discuss the relationship between entropy econophysics evolution and economic complexity respectively with applications in urban and regional dynamics ecological economics general equilibrium theory as well as financial market dynamics The final chapter works to bring together these themes into a broader framework and expose some of the limits concerning analysis of deeper foundational issues With applications in all disciplines characterized by interconnected nonlinear adaptive systems this book is appropriate for graduate students professors and practitioners in economics and related disciplines such as regional science mathematics physics biology environmental sciences philosophy and psychology *Complex Systems Modeling and Simulation in Economics and Finance* Shu-Heng Chen, Ying-Fang Kao, Ragupathy Venkatachalam, Ye-Rong Du, 2018-11-20 This title brings together frontier research on complex economic systems heterogeneous interacting agents bounded rationality and nonlinear dynamics in economics The book contains the proceedings of the CEF2015 21st Computing in Economics in Finance held 20

22 June 2015 in Taipei Taiwan and addresses some of the important driving forces for various emergent properties in economies when viewed as complex systems The breakthroughs reported in this book are a result of an interdisciplinary approach and simulation remains the unifying theme for these papers as they deal with a wide range of topics in economics The text is a valuable addition to the efforts in promoting the complex systems view in economic science The computational experiments reported in the book are both transparent and replicable **Complex System Modeling and Simulation in Economics and Finance** is useful for graduate courses of complex systems with particular focus on economics and finance At the same time it serves as a good overview for researchers who are interested in the topic

Limits Of Mathematical Modeling In The Social Sciences, The: The Significance Of Godel's Incompleteness Phenomenon Francisco Antonio Doria, 2017-05-30 Current mathematical models are notoriously unreliable in describing the time evolution of unexpected social phenomena from financial crashes to revolution Can such events be forecast Can we compute probabilities about them Can we model them This book investigates and attempts to answer these questions through G del's two incompleteness theorems and in doing so demonstrates how influential G del is in modern logical and mathematical thinking Many mathematical models are applied to economics and social theory while G del's theorems are able to predict their limitations for more accurate analysis and understanding of national and international events This unique discussion is written for graduate level mathematicians applying their research to the social sciences including economics social studies and philosophy and also for formal logicians and philosophers of science

Handbook of Entrepreneurship Research Zoltan J. Acs, David B. Audretsch, 2010-08-03 Interest in and attention to entrepreneurship has exploded in recent years Nevertheless much of the research and scholarship in entrepreneurship has remained elusive to academics policymakers and other researchers in large part because the field is informed by a broad spectrum of disciplines including management finance economics policy sociology and psychology often pursued in isolation from each other Since its original publication in 2003 the Handbook of Entrepreneurship Research has served as the definitive resource in the field bringing together contributions from leading scholars in these disciplines to present a holistic multi dimensional approach This new edition fully revised and updated and including several new chapters covers all of the primary topics in entrepreneurship including entrepreneurial behavior risk and opportunity recognition equity financing business culture and strategy innovation and the impact of entrepreneurship on economic growth and development Featuring an integrative introduction extensive literature reviews and reference lists the Handbook will continue to serve as a roadmap to the rapidly evolving and dynamic field of entrepreneurship

Shifting Patterns of Agricultural Trade Vasili Erokhin, Gao Tianming, Jean Vasile Andrei, 2021-08-06 This book is a pivotal publication that seeks to improve food security in the conditions of escalating protectionism in global agricultural trade The authors argue that global trade systems have been increasingly distorted by emerging trade tensions between major actors such as the US China the EU and Russia as well as trade policies in many other countries In view of the

most recent disruption of global food supply chains due to the outbreak of the COVID 19 the book examines the effects of administrative restrictions tariff escalations and other forms of protectionism on food security Over the decades food security concerns have been emerging along with the growth of the world population More than two billion most impoverished people in the world spent up to 70% of their disposable income on food In 2020 the running pandemic has unraveled accumulated problems As many countries rely on agricultural imports lockdowns and disrupted food production and supply chains tremendously threaten food security of those nations Agricultural trade was already slowing in 2019 before the virus struck weighed down by trade tensions and decelerating economic growth The spread of the virus and strict quarantine measures trigger economic decline that results in food prices rises and volatilities Due to the pandemic nearly all regions will suffer double digit decline in trade volumes 2020 The virus will be defeated but the effects of the protectionism outbreak would have a much longer lasting impact on agricultural production international supply chains and food security worldwide In this publication the authors probe into many of the choices that link national regional and global policies extensively with the provision of food security for all in the new era of post virus global trade Since studying global agricultural trade has a multinational application its outcomes might be shared with a broad international network of stakeholders including research institutions universities and individual researches The book is appropriate for government officials policymakers and businesses of many countries Adaptation of research outcomes and solutions to the situation in particular countries and various collaboration formats will let to increase the visibility of the publication and to elaborate new practices and solutions in the sphere of establishing sustainable food security
