Construction Contracts 3e Law And Management:

Construction Contracts Jimmie Hinze, 2010-09-10 *Construction Contracts 3e* was written to serve as a learning tool and reference guide. The fundamentals of contract law are presented along with an in-depth treatment of the construction topics which most frequently result in litigation illustrated by example cases. In addition, the author provides an overview of other important construction-related topics including the procurement process for construction contracts, methods of dispute resolution, surety bonds, construction insurance, construction safety, and construction labor laws. The book is of a manageable size for a one-semester course and suitable for undergraduate or graduate construction or architecture students. The 3rd edition incorporates many changes in construction law, regulation, and practice that have occurred during the past decade.

Risk Avoidance for the Building Team Basil Sawczuk, 2002-11 Covering each stage of the production process in turn, this book examines potential problem areas in risk avoidance from the point of view of each of the three main parties involved: employer, consultant, and contractor.

Organisational Ethics in the Built Environment Jason Challender, 2023-10-09 *Organisational Ethics in the Built Environment* A comprehensive analysis of the critical role played by ethics in construction organisations and a toolkit for implementing a strong ethical culture. In *Organisational Ethics in the Built Environment*, accomplished construction leader Jason Challender delivers an insightful and important resource for construction industry professionals contributing to the creation of safe and suitable projects. The author explains how to construct the foundation for ethical building and business practices in the construction industry and explores the methods, motives, and rationales behind successful and ethical projects from an organisational and industry perspective. You will learn how practical improvements to organisational ethics can promote ethical standards, behaviours, and practices and influence the success of projects in the built environment. You will also discover the importance of leadership, motivational management, human resource management, corporate responsibility, and social value in encouraging strict compliance and adherence to ethical principles, values, and standards within organisations. Readers will also find a thorough introduction to the critical importance of trust, collaborative working, and partnering arrangements in contemporary construction and engineering organisations. Comprehensive explorations of the relevance of environmental ethics. Practical discussions of how to link corporate policies and strategies to ethical guidelines. Case studies from across a variety of knowledge fields including manufacturing and retail. Perfect for construction managers. *Organisational Ethics in the Built Environment* will also benefit undergraduate and postgraduate students of construction business management, engineering, and other construction-related subjects.
