

Electric adjustments

To adjust the electric seats, switch on the ignition or start the engine if the vehicle has gone into economy mode. Seat adjustments are also possible for a short period after opening one of the front doors or switching off the ignition.

1. Adjustment of the seat height and angle, and longitudinal position

Raise or lower the front of the control to adjust the seat cushion angle.

Raise or lower the rear of the control to raise or lower the seat.

Slide the control forwards or backwards to move the seat forward or back.

2. Adjustment of the backrest angle

Move the control forwards or backwards to adjust the backrest angle.

3. Adjustment of the angle of the top of the backrest

Move the control forwards or backwards to adjust the angle of the top of the backrest.

4. Adjustment of lumbar support

This function allows you to independently adjust the height and level of lumbar support.

Move the control:

- Forwards or backwards to increase or reduce the lumbar support.
- Upwards or downwards to raise or lower the lumbar support zone.

! Before moving the seat backwards, ensure that there is nothing that might prevent the full travel of the seat, so as to avoid the risk of jamming the seat caused by the presence of objects on the floor behind the seat or rear passengers. If the seat jams, stop the movement immediately.
