more subscribers began to use the site so the number of postings to it also began to grow as well. Certainly those people who were looking to fill technical positions found this list to be a great way of reaching those with the necessary skills that they were searching for. Because of this the demand for a section dedicated to jobs was created. Plus the demand by the lists users for more categories to be able to post and search under also began to grow as well. It was at this time that more and more of the sites users asked for a web interface to be set up. It was through the help of various volunteers and contractors that such a website user interface was created for each different mailing list category to be found on the list. As the domain required a name Craig Newman first registered craigslist.org and then followed it up later on with craigslist.com which helped to prevent the name from being used for some other purpose. Certainly if you were to search on Craigslist today the most popular of all the forums is the one known as the Erotic Forum. This forum is now often used by law enforcement agencies for decoy operations and Craigslist.co operates in any way it can to help prevent its users from selling drugs, sex, or stolen property through its listings. Through this book we are going to look at the ways in which a person can legally profit from using Craigslist. We will discuss the ways in which a person can set up a business in their own home and which will provide them with a chance to earn an additional income or their main form of income.

*An Internet for the People* Jessa Lingel, 2022-06-14

How Craigslist champions openness, democracy, and other vanishing principles of the early web. Begun by Craig Newmark as an e-mail to some friends about cool events happening around San Francisco, Craigslist is now the leading classifieds service on the planet. It is also a throwback to the early Internet. The website has barely seen an upgrade since it launched in 1996. There are no banner ads. The company doesn't profit off your data. *An Internet for the People* explores how people use Craigslist to buy and sell, find work and find love, and reveals why Craigslist is becoming a lonely outpost in an increasingly corporatized web. Drawing on interviews with Craigslist insiders and ordinary users, Jessa Lingel looks at the site's history and values, showing how it has mostly stayed the same while the web around it has become more commercial and far less open. She examines Craigslist's legal history, describing the company's courtroom battles over issues of freedom of expression and data privacy, and explains the importance of locality in the social relationships fostered by the site. More than

an online garage sale job board or dating site craigslist holds vital lessons for the rest of the web It is a website that values user privacy over profits ease of use over slick design and an ethos of the early web that might just hold the key to a more open transparent and democratic internet
