Creating A Green And Cultural Economy Creating A Green And Cultural Economy:

Creating a Green and Cultural Economy Ram Ramprasad, 2011-06-01 A unique book that takes the reader into the depths and mysteries of creating a wondrous people initiated economic plan grounded in centuries of cultural and ecological wisdom In a tapestry of factual and everyday events the author makes a well reasoned argument that we first need to address culture then a sustainable lifestyle then ecology and finally economics The author strongly reasons that this paradigm in the current century has been reversed by all the countries of the world The authors compelling argument makes the reader ask some thought provoking questions Is our present state of affairs increasing costs in all areas of the economy Is our system of education placing a distorted emphasis in creating an army of misplaced problem solvers Is this the right approach What is cultural economy Is a culture based economy better than a consumer economy The adventure filled story telling in this book is a blend of the ancient wisdom of the East with suggestions to using the right sources of practical technological wisdom from the East and the West It takes the current state of our affairs and economic planning and simply turns the current logic on its head The reader finds several clues on how to implement and create a people initiated economic plan without necessarily changing his or her current station in life The beauty of the book is that any person can help create a technological culture that is aligned with nature and ecology A scholarly book that offers a fascinating reading as pleasant as reading a novel

Culture, Innovation and the Green Economy Biljana Mickov, 2025-06-25 The book offers a theoretical and practical analysis of the contemporary approach to art culture and innovation with special

emphasis on the relationship between culture innovation and the economy in the context of green transition as an indispensable sustainability factor. It presents new models that can be implemented especially within strategic cultural planning serving to ensure future development and attain certain levels of stability. The book argues that the cultural ecosystem should not be treated as merely a segment of the economy but rather as a system that contains the economy. One of the main issues covered in the book is climate change. More than fifty years have passed since the first major conference of the United Nations UN on the Environment held in Stockholm in 1972 which gave birth to the Stockholm Declaration and also cemented the global environmental movement. Thanks to Agenda 2030 the 17 Sustainable Development Goals and the Paris Agreement there is an increased awareness of the dangers posed by climate change and of the need to switch to sustainable energy sources and a circular economy in the hope of preventing environmental problems that threaten life on Earth. Each chapter provides an accessible bank of knowledge on which existing theory and practice can be developed and new projects undertaken. The book adopts a highly interdisciplinary approach for open science bridging theoretical insights with practical applications and offers a comprehensive perspective that is both informative and actionable so it can be used by academics, researchers, policy makers and cultural professionals for planning and development within the cultural sector. Biljana Mickov is a cultural researcher and professor. She holds a PhD from University of Reims Champagne Ardenne.

Cultural Economy Paul du Gay, Michael Pryke, 2002-01-31. Phrases such as corporate culture, market culture and the knowledge economy have now become familiar. Clarion calls in the world of work. They are calls that have echoed through organizations and markets. Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution. In particular the once clean divide that placed the economy dealt with mainly by economists on one side and culture addressed chiefly by those in anthropology, sociology and the other cultural sciences on the other can no longer hold. This volume presents the work of an international group of academics from a range of disciplines including sociology, media and cultural studies, social anthropology and geography, all of whom are involved not only in thinking culture into the economy but thinking culture and economy together. *The Role of Smart Technologies in Decision Making* Eleonora Pantano, Francesca Serravalle, 2022-10-20. Market forces and technological advancements are making the management of and strategies for innovation more prominent and essential in all functions of business, not least marketing and retailing. Frontiers of marketing are constantly pushed, requiring the development and adjustments of new theories. Prior literature on innovation in marketing has mainly focused on digital marketing strategies and consumer behaviour while only recently introducing the notion of smart retailing in terms of smart experience and interaction. While these studies provide a basis for defining smart retailing and consumer behaviour in smart retail settings.

the concept of smart consumers is still under investigated Thus the smart consumer consumers making extensive use of smart technologies in all steps of their shopping behaviour and experience of the store both offline and online is emerging as a promising area for future marketing and retailing studies The chapters in this edited volume seek to understand the effect of innovation in consumer behaviour by proposing original empirical and theoretical contributions methods models tools and case studies that contribute to explain this emergent phenomenon The chapters in this book were originally published as a special issue of the Journal of Marketing Management
