Beyond Western Economics Trent Schroyer, 2009-05-08 This book combines intellectual history with contemporary events to offer a critique of mainstream economic thought and its neoliberal policy incarnation in global capitalism The critique operates both theoretically at the level of metaphysics and the philosophy of science and concretely in case studies of globalization and world events Trent Schroyer provides a moral and cultural interpretation of modernity and scientism highlighting their

political and economic consequences but the book's main purpose is not to criticize. The author moves beyond this to offer alternative economic cultures again combining abstract theoretical analysis with concrete case studies of alternative economic formations from local self sufficiency movements to cooperatives and other anti capitalist institutional experiments. These case studies exhibit an impressive range of variation from first world to third world from reformist to utopian transformative. Finally Schroyer links the project to the global justice movement that opposes corporate globalization and eventually links participatory economics and democratic politics to a new image of science as participatory social learning.

Building a Win-Win World Hazel Henderson, 1997-10-09 She finds paths from competition to cooperation from global abuse to grassroots solutions and thus from isolated despair to communal action. Gloria Steinem World renowned futurist Hazel Henderson extends her twenty five years of work in economics to examine the havoc the current economic system is creating at the global level. Markets are now spreading worldwide a spread which is often equated with the hope of democracy spreading along with it. But markets still run on old textbook models that ignore social and environmental costs leading to a new kind of warfare global economic warfare. **Building a Win Win World** examines how jobs education health care human rights democratic participation socially responsible business and environmental protection are all sacrificed to global competitiveness. Henderson shows many ways out of the dilemmas faced by all countries. She also describes a trend toward grassroots globalism citizens movements that are addressing poverty social inequities pollution resource depletion violence and wars. Grassroots globalism she says is about thinking and acting globally and locally. It is pragmatic problem solving implementing local solutions that keep the planet in mind. Such social innovations can raise the ethical floor under the global playing field so that the most ethical companies and countries can win. At a time when conventional economics is tottering into senility a handful of thinkers are forging imaginative alternatives. Hazel Henderson is among the most eloquent original and readable of the economists. *Scientific American* Hazel Henderson again challenges our fundamental economic systems our musty ways and our minds she is a visionary who describes what should be our future. Mega-Events as Economies of the Imagination Rodanthe Tzanelli, 2017-10-10 Atmosphere the elusive ambiance of a place enables or hinders its mobility in global consumption contexts. Atmosphere connects to social imaginaries utopian representational frames producing the culture of a city or country. But who resolves atmospheric contradictions in a place's social and cultural rhythms when the eyes of the world are turned on it? **Mega Events as Economies of the Imagination** examines ephemeral and solidified atmospheres in the Rio 2016 Olympic Games and the handover ceremony to Tokyo for the 2020 Games. Indeed highlighting the various social and cultural implications upon these Olympic Games hosts Tzanelli argues that the Olympic City is produced by aesthetic imagineers mobile groups of architects artists and entrepreneurs who aesthetically engineer native cultures as utopias. Thus it is explored as to how Rio and Tokyo's imagineers problematize notions of creativity cosmopolitan togetherness and belonging.
