Critica De La Razon Pura Filosofia Spanish Edition:

Experiencing the Beyond Gert Melville, Carlos Ruta, 2017-11-20 Experiencing the dimension that lies beyond our empirical grasp of the world has always been a challenge for human beings for it can expose the limitations of our agency Such experience while potentially terrifying can also furnish a basis for religious faith or hope of a better future The intercultural essays in this volume analyze ways of dealing with the beyond including magic religion myth and all promising utopias

Translation and Censorship in Different Times and Landscapes Maria Lin Moniz, Teresa Seruya, 2009-03-26 This volume is a selection of papers presented at the international conference on Translation and Censorship From the 18th Century to the Present Day held in Lisbon in November 2006 Although censorship in Spain under Franco dictatorship has already been thoroughly studied the Portuguese situation under Salazar and Caetano has been so far almost ignored by the academic research This is then an attempt to start filling this gap At the same time new case studies about the Spanish context are presented thus contributing to a critical view of two Iberian dictatorial regimes However other geographical and time contexts are also included former dictatorships such as Brazil and Communist Czechoslovakia present day countries with very strict censoring apparatus such as China or more subtle censorial mechanisms as Turkey and Ukraine Specific situations of past centuries are given some attention the reception of Ovid in Portugal the translation of English narrative fiction into Spanish in the 18th century the translation of children literature in Victorian England and the emergence of the picaresque novel in Portugal in the 19th century Other forms of censorship namely self censorship are studied in this volume as well The book fits in one of the most innovative fields of research in translation studies i e the study of social and political constraints on translation processes and translation functions More specifically the concept of censorship is crucial to the understanding of these constraints especially in spatio temporal settings where translation exhibits conflicts between what is acceptable for and what is prohibited by a given culture For that reason detailed descriptive research is needed in as many situations as possible It gives an excellent view on the complex mechanisms of censorship with regard to translation within a large number of modern European and non European cultures In addition to articles devoted to cases dealing with China Brazil Great Britain Turkey Ukraine or Czechoslovakia Spain and Portugal occupy a prominent role As a whole the volume marks an important step forward in our growing understanding of the role of socio political factors for the development and changes of translation policies I highly recommend the publication Prof dr Lieven D hultst Professor of Translation Studies at K U Leuven Belgium

Crossfire Roberta Johnson, 2021-10-21 The marriage of philosophy and fiction in the first third of Spain s twentieth century was a fertile one It produced some truly notable offspring novels that cross genre boundaries to find innovative forms and treatises that fuse literature and philosophy in new ways In her illuminating interdisciplinary study of Spanish fiction of the Silver Age Roberta Johnson places this important body of Spanish literature in context through a synthesis of social literary and philosophical history Her examination of the work of Miguel de Unamuno Pio Baroja Azorin

Ramon Perez de Ayala Juan Ramon Jimenez Gabriel Miro Pedro Salinas Rosa Chacel and Benjamin Jarnes brings to light philosophical frictions and debates and opens new interpersonal and intertextual perspectives on many of the period's most canonical novels Johnson reformulates the traditional discussion of generations and isms by viewing the period as an intergenerational complex in which writers with similar philosophical and personal interests constituted dynamic groupings that interacted and constantly defined and redefined one another Current narratological theories including those of Todorov Genette Bakhtin and Martinez Bonati assist in teasing out the intertextual maneuvers and philosophical conflicts embedded in the novels of the period while the sociological and biographical material bridges the philosophical and literary analyses The result solidly grounded in original archival research is a convincingly complete picture of Spain's intellectual world in the first thirty years of this century Crossfire should revolutionize thinking about the Generation of 98 and the Generation of 14 by identifying the heterogeneous philosophical sources of each and the writers' reactions to them in fiction

On Genes, Gods and Tyrants Camilo J. Cela-Conde, Penelope Lock, 2012-12-06 Our future was with the collective but our survival was with the individual and the paradox was killing us everyday John Le Carre Smiley's People 1979 Since the time of Ancient Greek lyrical poetry it has been one of man's dreams to explain his own conduct This is the background to all his activities from literature to speculative philosophy including those odds and ends which for want of a better name and more precise boundaries are called human science Over the past nine or ten years a new member has been added to this inquisitive family one which moreover claims to be scientific to an extremely high degree biology This is in fact a recurrent event since theses designed to introduce causal biological explanations into the general field of human action had already been formulated on at least two occasions in original Darwinism and the Neo Darwinist synthesis Ethologists and sociobiologists are today taking over and assuring us that they have the necessary tools to provide an answer to what perhaps seemed the most slippery subject in the hands of science the social being As might be expected philosophers have reacted with some scepticism Though human conduct is undoubtedly subject to determinants the lion's share of responsibility lies with society itself At the time when biology was beginning to develop the theories necessary to overcome creationism Karl Marx had already managed to construct highly sophisticated interpretive models of human social behaviour

The Reception of Positivism in Spain José Franco-Chasán, 2023-11-24 Pedro Dorado Montero was one of Spain's most relevant authors He contributed to modern Criminal law and Penology with a very unique theory the Protective Law for Criminals In a time when neoclassical penal theories and new positivist theories clashed Dorado Montero's proposal served as a bridge between the criminal law conceptions of the 19th and 20th centuries In order to explore his role in the introduction of positivism within Spain and the subsequent success of this trend this book addresses several aspects The first three analyzed are his scholarly career the historical and international context in which he lived and the various European and other international influences he was exposed to On this basis two major points are then discussed Firstly Dorado Montero has been traditionally included within

the movement known as correccionalismo However his legal philosophical and criminal thought indicates otherwise It seems to lie closer to positivism than to neoclassical positions This research aims at challenging the accuracy of the eclectic label which traditional historiography has applied to him In turn Dorado Montero described a reality in which every moral value and legal representation was a mere product of mankind s imagination Man is responsible for the elaboration of morals law and culture in his own mind Thus for him there were as many moral and legal orders as there were human beings on the planet Such a claim is polemic even today Unsurprisingly the author received criticism from both neoclassical and positivist schools Thus the existence of a Doradian positivism is explored Despite the growing interest in these topics over the last few decades Dorado Montero has somehow been overlooked even though his Derecho protector de los criminales described the criminal law of the future as well one that will have to face the new neurological medical psychological and genetic challenges of our time
