The Palgrave Handbook of Biology and Society Maurizio Meloni, John Cromby, Des Fitzgerald, Stephanie Lloyd, 2017-10-27 This comprehensive handbook synthesizes the often fractured relationship between the study of biology and the study of society Bringing together a compelling array of interdisciplinary contributions the authors demonstrate how nuanced attention to both the biological and social sciences opens up novel perspectives upon some of the most significant sociological anthropological philosophical and biological questions of our era The six sections cover topics ranging from genomics and epigenetics to neuroscience and psychology to social epidemiology and medicine The authors collaboratively present state of the art research and perspectives in some of the most intriguing areas of what can be called biosocial and biocultural approaches demonstrating how quickly we are moving beyond the acrimonious debates that characterized the border between biology and society for most of the twentieth century This landmark volume will be an extremely valuable resource for scholars and practitioners in all areas of the social and biological sciences The chapter Ten Theses on the Subject of Biology and Politics Conceptual Methodological and Biopolitical Considerations is open access under a CC BY 4 0 license via link [springer.com](https://www.springer.com) Versions of the chapters The Transcendence of the Social Scrutinizing the Epigenetics Revolution Species of Biocapital 2008 and Speciating Biocapital 2017 and Experimental Entanglements Social Science and Neuroscience Beyond Interdisciplinarity are available open access via third parties For further information please see license information in the chapters or on link [springer.com](https://www.springer.com)

Neuroscience and Education Clarence W. Joldersma, 2016-03-02 This volume makes a philosophical contribution to the application of neuroscience in education It frames neuroscience research in novel ways around educational conceptualizing and practices while also taking a critical look at conceptual problems in neuroeducation and at the economic reasons driving

the mind brain education movement It offers alternative approaches for situating neuroscience in educational research and practice including non reductionist models drawing from Dewey and phenomenological philosophers such as Martin Heidegger and Merleau Ponty The volume gathers together an international bevy of leading philosophers of education who are in a unique position to contribute conceptually rich and theoretically framed insight on these new developments The essays form an emerging dialogue to be used within philosophy of education as well as neuroeducation educational psychology teacher education and curriculum studies *Emotions in Cultural Context* Girishwar Misra,Indiwar

Misra,2024-05-16 This book approaches emotion from a cultural perspective in applied contexts consolidating new research that examines the interface of emotions with various aspects of human life It provides insights into the vibrant and growing field of emotion research by rearticulating the distinction and interrelationships of the trilogy of mind consisting of cognition affection and conation It brings into focus indigenous and culturally relevant conceptualizations of emotion processes Among the topics covered Emotions at work applications of emotional intelligence Indian perspectives on youth compassion and moral well being Parental emotion regulationstrategies Role of emotions in construction of social identities Emotions in Cultural Context offers an up to date exploration of recent work in psychology of emotions *Re-Thinking Autism* Sami Timimi,Rebecca Mallett,Katherine Runswick-Cole,2016-05-05 Disputing the existing accepted approaches to autism and the focus on diagnosis and treatment this book challenges the attitudes assumptions and prejudices around autism that are generated from the medical model suggesting that they can be marginalising limiting and potentially damaging to the individuals labelled with autism **Cultural Turns** Doris Bachmann-Medick,2016-01-15 The contemporary fields of the

study of culture the humanities and the social sciences are unfolding in a dynamic constellation of cultural turns This book provides a comprehensive overview of these theoretically and methodologically groundbreaking reorientations It discusses the value of the new focuses and their analytical categories for the work of a wide range of disciplines In addition to chapters on the interpretive performative reflexive postcolonial translational spatial and iconic turns it discusses emerging directions of research Drawing on a wealth of international research this book maps central topics and approaches in the study of culture and thus provides systematic impetus for changed disciplinary and transdisciplinary research in the humanities and beyond e g in the fields of sociology economics and the study of religion This work is the English translation by Adam Blauhut of an influential German book that has now been completely revised It is a stimulating example of a cross cultural translation between different theoretical cultures and also the first critical synthesis of cultural turns in the English speaking world

Cultural Sociology of Mental Illness Andrew Scull,2013-12-20 Cultural Sociology of Mental Illness An A to Z Guide looks at recent reports that suggest an astonishing rise in mental illness and considers such questions as Are there truly more mentally ill people now or are there just more people being diagnosed and treated What are the roles of economics and the pharmacological industry in this controversy At the core of what is going on with mental illness in America and around

the world the editors suggest is cultural sociology How differing cultures treat mental illness and in turn how mental health patients are affected by the culture In this illuminating multidisciplinary reference expert scholars explore the culture of mental illness from the non clinical perspectives of sociology history psychology epidemiology economics public health policy and finally the mental health patients themselves Key themes include Cultural Comparisons of Mental Health Disorders Cultural Sociology of Mental Illness Around the World Economics Epidemiology Mental Health Practitioners Non Drug Treatments Patient the Psychiatry and Psychology Psychiatry and Space Psychopharmacology Public Policy Social History and Sociology Key Features This two volume A Z work available in both print and electronic formats includes close to 400 articles by renowned experts in their respective fields An Introduction a thematic Reader s Guide a Glossary and a Resource Guide to Key Books Journals and Associations and their web sites enhance this invaluable reference A chronology places the cultural sociology of mental illness in historical context 150 photos bring concepts to life The range and scope of this Encyclopedia is vivid testimony to the intellectual vitality of the field and will make a useful contribution to the next generation of sociological research on the cultural sociology of mental illness [Neurorhetorics](#) Jordynn Jack,2013-09-13 In academia as well as in popular culture the prefix neuro now occurs with startling frequency Scholars now publish research in the fields of neuroeconomics neurophilosophy neuromarketing neuropolitics and neuroeducation Consumers are targeted with enhanced products and services such as brain based training exercises and babies are kept on a strict regimen of brain music brain videos and brain games The chapters in this book investigate the rhetorical appeal effects and implications of this prefix neuro and carefully consider the potential collaborative work between rhetoricians and neuroscientists Drawing on the increasingly interdisciplinary nature of rhetorical study Neurorhetorics questions how discourses about the brain construct neurological differences such as mental illness or intelligence measures Working at the nexus of rhetoric and neuroscience the authors explore how to operationalize rhetorical inquiry into neuroscience in meaningful ways They account for the production dissemination and appeal of neuroscience research findings revealing what rhetorics about the brain mean for contemporary public discourse This book was originally published as a special issue of Rhetoric Society Quarterly

Psychological Governance and Public Policy Jessica Pykett,Rhys Jones,Mark Whitehead,2016-12-01 There have been significant developments in the state of psychological neuroscientific and behavioural scientific knowledge relating to the human mind brain action and decision making over the past two decades These developments have influenced public policy making and popular culture in the UK and elsewhere through policies and emerging social practices focussed on behavioural change happiness wellbeing therapy resilience and character Yet little attention has been paid to examining the wider political and ethical significance of the widespread use of psychological governance techniques There is a pressing and recognised need to address the behaviour change agenda in relation to how our cultural ideas about the brain mind behaviour and self are changing This book provides a critical account of existing forms of psychological governance in

relation to public policy It asks whether we can speak of a co ordinated and novel shift in governance or rather whether these trends are more simply pragmatic policy tools based on advances in scientific evidence With contributions from leading scholars across the social sciences from the UK the USA and Canada chapters identify practical political and research challenges posed by the current policy enthusiasm for particular branches of affective neuroscience behavioural economics positive psychology and happiness economics The core focus of this book is to investigate the ways in which knowledge about the mind brain and behaviour has informed the methods and techniques of governance and to explore the implications of this for shaping citizen identity and social practice This groundbreaking book will be of interest to students scholars and policy makers interested and working within geography economics sociology psychology politics and cultural studies
